

FEATURES OF THE TMG-SERIES

- Fits all pumps in the PHS-series
- Simple snap-on design
- Increased application opportunities due to enhanced protection
- Saves valuable time using the product instead of repairing it
- Robust design
- Great overview and reading of the gauge inspite of the grid

GAUGE PROTECTION TMG-SERIES

Original accessories from REHOBOT ensure the function and increase the usability of your hydraulic equipment.

Information

Robust gauge protection is ideal for harsh environments and favoured where the fear of dropped objects is high. Provides a safe and healthy working environment.

Functionality

Prepared and designed to fit on all of our pumps in the PHS-series both for small and the large gauges.

Easily attached with a snap-on design without any extra tools necessary!

Usability

The TMG-series is applicable in:

- Scraping and demolition
- Industrial applications
- Rescue services
- Civil defence
- Emergency aid operations
- Marine and off-shore
- Oil and gas
